NEWSLETTER 12

APRIL 01-15/2010

Our earlier newsletters had philosophized about Lean Construction –

Definition, dire need, benefits of Lean Construction were spelt out.

Reaching out was also achieved by a highly appreciated seminar on 10 & 11 November 2009

The next step – **to implement lean construction in individual companies** – in the construction industry.

Towards this long journey

ILCE announces “**LEAN CONSTRUCTION AWARENESS PROGRAMS**”

The programs are **FREE**.

Duration : 2 hours

The programs to be done in YOUR COMPANY PREMISES

The programs are not a prelude for any training fee paying programs

The programs are for all players in the construction industry – owners, architects, consultants, suppliers, academic institutions
