15 NOV – 1 DEC 2009

Elated to announce the most successful ILCE Launch Seminar “Construction Excellence Through Lean” on 10 & 11 November 2009.

Feedback –

- **Prof. L. Koskela – Principal Speaker**

It was a real privilege to be involved in the lean construction workshop of ILCE. I have never encountered such a receptive and knowledgeable audience when presenting lean construction issues in different countries.

- **Mr. A. Master – President – Projects - Wockhardt Limited**

Excellent beginning. Sharing of how people are avoiding waste and improving productivity will help others do similar things. Sharing of this via ILCE mail distribution can help all achieve low hanging fruits right away. In our environment where inefficiency and wastage at all levels is order of the day, your effort in bringing leaders in the construction industry together is a great achievement. Keep up the good work!

- **N.Raghavan, Visiting Professor, IIT Chennai**

It was a path-breaking seminar which churned up so many new ideas for streamlining Indian Construction and making it more efficient. Now the ball is in the Court of the Industry to implement the excellent concepts which have come up in the course of the energetic deliberations of this international Conference.

- **Anil Bakshi –CEO, Arc Associates**

The Programme was very nicely structured and the level of participation was amazing. I can, without exaggeration, say that the overall content, presentation and interaction far exceeded my expectations. It will be a hard act to follow and maintain for you and the team.

- **Dr. K. Ramamurthy- Director Project, IREO**

The conference experience, I was fortunate to get it: it was a great eye-opener for me; for India to embrace, we need to struggle hard and with will-power and devotion from the top management

Many Many Kudos!!!

But what next?

Your suggestions please.
